

ENKI
Design by Jacob Jensen

WODOR

A TRIBUTE TO LIFE AND WATER

The water cooler ENKI™ has been designed by Jacob Jensen Design as a tribute to the vitalizing effects of water. It is a slim, elegant and user-friendly POU water cooler, which creates an image of purity and hygiene. Designed to be the centre of attention, ENKI is the only water cooler with no front or back.

The ENKI is chosen where design and demands for high quality are a must. Financial companies, law firms, corporate industry, advertising, Design and Architectural companies, exclusive car dealers, are just some of the already existing clients of ENKI.

ABOUT JACOB JENSEN DESIGN

Every generation has its pioneers. Jacob Jensen is one of those. Throughout 50 years he has contributed to our understanding and appreciation of how things surrounding us can be. With a unique and classic design Jacob Jensen has shown us that Hi-fi music systems, telephones, watches, cars, modems, wind turbines and many other everyday items are able to contain a simple and pure beauty.

COLOUR

The elegant **brushed steel** and **aluminum** cabinet with the **piano black** top and bottom design is a beautiful compliment to any décor.
