MineralPURE® POOL SYSTEM

For the Home

Premium Model — RC-50

50,000 gallon capacity

Our latest model! Unquestionably, the finest copper/silver ionization system in the world. All new state-of-the-art micro-processor designed model features a large LCD display window for easy monitoring. Features 120 precise settings in 5 mA increments, “check electrode” warning and more. Unique flow-cell assembly allows for visual inspection of the electrodes and easy change-out without any tools. Works much more efficiently on lower TDS levels and on “worn-out” electrodes than any other model. Meets NSF Standard 50 by a UL Sanitation evaluation. Now as an added bonus, the unit includes a “built-in” Ion-Mate – ScaleBlaster that will remove and prevent scale buildup in pipes, pool equipment and removes scale on pool walls without any maintenance. All new weatherproof enclosure includes PVC fittings, Ion Test Kit, and signal cable wire for the built-in ScaleBlaster unit. Unit automatically adjusts to 110/220 VAC upon installation. Handles up to 50,000 gallon swimming pools.

Full 5-year warranty.

Exceptional “Go Green” Model SB-150

Our extraordinary select model – a certified “Go Green” product! Everybody is going green and so is this model! Highly recommended in hard to very hard water areas and large houses. Newly developed signal is five times the power of the SB-125! Full 10- year warranty included. Indoor or outdoor installation. UL approved heavy duty enclosure. Includes 115 VAC plug, but will work on 230 VAC automatically if needed. “Scanning frequencies” LED. Includes 120-day more back guarantee. Maximum pipe size - 1 ¼” • Water Hardness range - 1-50 gpg (1-855 ppm) • Pipe type – Copper, PVC, PEX

Super Deluxe Premium Model SB-175

Our incomparable model with superior results in “rock hard” like areas. Brand new model! Designed specifically for those in extremely hard water areas (including well water) with hardness levels over 25 gpg (428 ppm) or those in very large houses with multiple floors and bathrooms. “Scanning frequencies” LED indicator. Ten year warranty. Works on 115 VAC or 320 VAC automatically. Durable, weatherproof UL-listed enclosure. Includes 120-day money back guarantee. Maximum pipe size – 1 ½” • Water hardness range 1-100 gpg (1710 ppm) • Pipe type – COPPER, PVC, PEX

Economical Premium Model

Economical Model

Steel Pipe Unit

Our top selling product for several years! Improved power to 400 mA. Ideal in medium-hard water areas and smaller houses. Full 10-year warranty. 115 VAC unless otherwise specified. Works on COPPER, PVC PEX pipe. Weather-proof enclosure. UL, CUL, CE listed.

Maximum pipe size - 1”
Water hardness range - 1-10 gpg (1-170 ppm)
Pipe type - Copper, PVC, PEX

Our economical model is designed for indoor installation and includes a 110-VAC plug-in transformer. 65 mA of power. Ideal for condos and mobile homes in medium hard water areas. Full 10-year warranty.

Maximum pipe size - 1”
Water hardness range - 1-7 gpg
Pipe type - copper, pvc

Designed specifically for ferrous based pipe (steel, iron, galvanized). Uses radio wave frequency. Maximum pipe size is 1 ½”. Full 10-year warranty.

Must specify 110 VAC or 220 VAC

Economical Models

There are two economical models available – the R-20 and the R-40. The R-20 will handle up to **20,000 gallons** pools in mild weather climates (10,000 in warm weather climates) while the R-40 will handle up to **40,000 gallons** (20,000 in warm weather climates). Economically priced, the R-20 is ideal for above-ground pools. The unit now comes in a new sharp liquid-tight enclosure with latch for easy opening and closing. Control knob has 5 settings in addition to “OFF”. Easy to view, self-contained electrode chamber. Test kit, pvc fittings included. Alternating electrode indicators on panel. Full 5-year warranty.

European CE approved transformer 220VAC
Order part # SB-50E

Must specify 110 VAC or 220 VAC
