# SCALE BLASTER™

The water softener alternative

## The Water Softener Alternative

**That hard water feeling.** Soap that won't lather well...bad hair days...unsightly limescale deposits on faucets, sinks, and other plumbing fixtures... mold & mildew on shower curtains... shortage of hot water...decreased water pressure...bad tasting water...water heater breaking down again.

Sound familiar? Chances are you live in a hard water area. Unless you have invested in an expensive and maintenance-prone water softener, you have taken your water for granted.

Introducing

**SCALEBLASTER™**

### How does it work?

ScaleBlaster's™ compact, integrated circuitry system sends a scientifically developed signal charge to an induction coil that is simply wrapped around the pipe entering your home. These inaudible sonic pulses change the electrical and physical properties of the limescale forming calcium molecules causing them to repel, rather than adhere to water pipes and fixtures. The calcium deposits are dissolved in the water and never return again.

- Revolutionary technology
- Environmentally safe
- Easy, do it yourself installation
- 100% satisfaction guarantee

### Clean and Efficient

Water softeners, using salt, discharge brines that can pollute the environment. For this reason they have been banned in parts of the U.S. ScaleBlaster™ is eco-friendly, UL-listed and validated by EPA approved laboratories and major universities. ScaleBlaster™ eliminates 'limescale' - mineral deposits that clog and corrode water pipes, water heaters, dishwashers, faucets, drains and shower-heads. It also puts an end to soap scum and staining of sinks, bathtubs, shower doors and commodes. ScaleBlaster™ increases the efficiency of water heaters-lowering energy bills. Amazingly, it extends the life of water pipes and appliances, makes it easier to clean and shine all surfaces, reduces soap and detergent use by up to 25%, not to mention it gives a softer feel to the skin, hair and clothing.

### No maintenance or chemicals required

A great feature about ScaleBlaster™ is that no maintenance or chemicals are required. No trips to the store for large bags of salt. ScaleBlaster™ operates automatically 24/7, using less energy than a nightlight! Installation is simple with no special tools or plumbing work required! The unit comes with a full 5-year warranty and has an expected 20-25 year lifespan. There is a 100% satisfaction guarantee or your money back! Tens of thousands of units have been sold since 1995 and it was recently featured on HGTV.

## The Difference is Clear

WATER SOFTENER	SCALEBLASTER™
Expensive to purchase	Inexpensive to purchase
Requires constant maintenance	Never needs maintenance
Makes skin feel dry	Makes skin feel softer
Makes water feel slippery	Makes water feel "silkier"
Soap suds difficult to remove	Soap suds wash away easily
Exchanges calcium for salt	Does not require salt
Harmful for people on salt restricted diets	Safe for people on salt restricted diets
Requires regular service calls	Requires no service calls
