Scale Blaster® - the electronic descaler

Revolutionary Breakthrough in Technology!

ScaleBlaster's® signal cable produces an oscillating and complex modulating frequency wave form that produces an inaudible sonic impulse that changes the electrical and physical properties of the scale-forming calcium molecules. This causes the adhesive properties of the calcium carbonate crystals and other minerals to repel rather than adhere to pipes, fixtures and remain suspended in the water. This action stops any further build-up of scale and because the solubility of the water is increased, existing scale is taken back into the water and gradually removed.

Absolutely No Maintenance Required

Up until now, the only other solution to your hard water problems was a water softener...

WATER SOFTENER	SCALEBLASTER®

Makes water feel slippery	Makes water feel "silkier"
Soap suds difficult to remove	Soap suds wash away easily
Exchanges calcium for salt	Does not require salt
Harmful for people on salt restricted diets	No effect with people on salt restricted diets
Requires regular service calls	Requires no service calls

Designed for residential use only.

PIPE TYPE: PVC, PEX, copper or any non-ferrous based pipe.

INPUT VOLTAGE/CURRENT: 100 to 240 VAC, @ < 500mA

INPUT POWER: < 15 Watt

OUTPUT VOLTAGE: 5V (open circuit).

OUTPUT CURRENT: 1350 mA

INPUT FUSE: 1Amp, 250VAC, 5x20mm, fast acting (F1 on pcb)

DESCALING METHOD: The control box supplies a square wave signal to a coil of wire that is wrapped around the pipe. The signal is changed anywhere from 1,000 to 20,000 times a second, producing a modulating frequency waveform that hits the resonant frequency of the calcium molecules causing them to lose it's adhesiveness.
